Supply Chain and Conservation of At-risk Medicinal Plants in Trade

You can download and read past issues of our Journal of Medicinal Plant Conservation.

<https://unitedplantsavers.org/journal-of-medicinal-plant-conservation/>

United Plant Savers maintains an At-risk list as well as its At-risk tool. The tool provides a simple way to determine if a plant should be in a formula.

<https://unitedplantsavers.org/species-at-risk-assessment-tool/>

Overseen by United Plant Savers, the Forest Grown program helps to support a shift to forest grown botanicals. Learn about the program here.
